

TSE SFA

BRING YOUR
PROJECTS
TO LIFE

MADE IN FRANCE

Specialist in
plastic
injection
since 1979

WHO ARE WE?

TSE embodies excellence in plastics processing! With a turnover of €11 million, a loyal customer base, and **more than 1,700 tons of material used**, we are the ideal partner to meet your plastic injection needs with quality and reliability.

TSE PRODUCES
17 MILLION PARTS
PER YEAR

42 PRESSES - 50T to 650T

A VERSATILE MACHINE PARK FOR YOUR INJECTION PROJECTS

Discover our range of **42 state-of-the-art** presses equipped with robots for optimal productivity, offering a modern and versatile solution. With hydraulic, electric, and hybrid options, we support your projects while reducing our environmental footprint.

OUR SERVICES

TSE masters injection for a wide range of volumes from **39 cm³ to 8588 cm³**, with high technical expertise (hollow parts, inserts, rubber, and elastomers).

Single-material injection molding

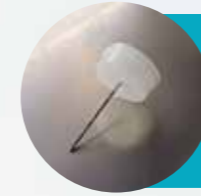

Rubber & elastomer injection molding

Bi-material injection molding

Turnkey projects

Hollow body injection

Material selection support

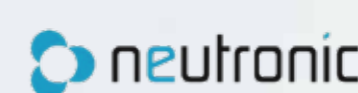

Insert overmolding

Tooling selection support

OUR BUSINESS SECTORS

BTP

Plastic injection in construction allows the production of a wide variety of parts with precision and consistency, including pipes, fittings, fasteners, electrical boxes, window and door components, and much more.

Well-being

Plastic injection plays a key role in well-being by offering innovative products that improve quality of life, from ergonomic sports equipment to massage devices and functional bathroom accessories.

Electricity / Electronics

Plastic injection is widely used for manufacturing electrical components (connectors, switches), network and telecommunication components, and accessories (protective casings, chargers, supports, etc.).

Industrial Packaging

Discover TSE's plastic injection services for industrial packaging. Robust, customizable, and environmentally friendly, our packaging is designed to meet your specific needs while reducing waste.

Sports & Leisure

TSE excels in the production of plastic parts, mastering both common materials such as Polyethylene (PE) and Polypropylene (PP), as well as more technical materials. Our expertise allows us to meet your specific requirements, including visual criteria.

Other Consumer Products

Plastic injection is essential in manufacturing consumer goods. This technique enables precise and cost-effective production of various parts, from household appliances to toys.
